

Vision Monitor

Thirty years of innovation

METROVISION, 4 rue des Platanes 59840 PERENCHIES France
Tel. 33 3 20 17 19 50 Fax 33 3 20 17 19 51 <http://www.metrovision.fr>

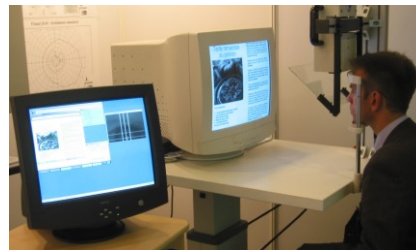

- 1986** First product of Metrovision:
Moniteur Ophtalmologique
for visual field and visual
electrophysiology
Patent US 4.626090

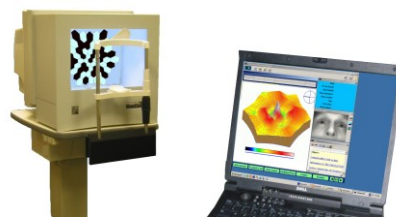

- 1990** Introduction of new tests for
pediatric ophthalmology:
MonBaby flash stimulator
Baby vision test
Steady state VEP

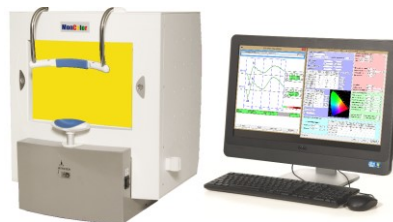

- 1995** Introduction of video –
oculography for fixation
monitoring, measurement of
pupil size and eye movements
Patent EP0237554B1

- 2002** Introduction of MonPack
stimulator with multifocal,
pattern and ganzfeld flash
stimulations for ERG and VEP

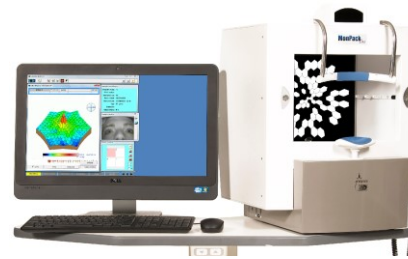

- 2006** Introduction of MonColor
High luminance 5 colors ganzfeld
stimulator for advanced
electrophysiology

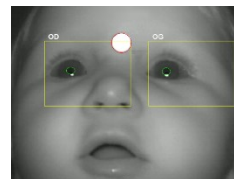

2007 Introduction of MonCv3 with central visual field, motion perimetry and new tests for visual aptitude, Contrast sensitivity, Glare, Attention field, ...

2012 Introduction of MonPackONE (artefact free luminance controlled LCD technology)
Patent FR2973630

2014 Introduction of new eye tracking technology for eye movement recording

2015 Introduction of MonCvONE and video imaging combined with perimetry
Patent pending
PCT/EP/2015/059428
